Element of
> Every Way Possible To Embed Modern Media With HTML Code

What does `<video> HTML Tag` do?
> The <video> element, which adds native video playback support to the HTML specification in HTML5, can be used to embed a video in an HTML document. Add the video URL to the element by using either the src attribute of the <video> element or by nesting one or more <source> elements between the opening and closing <video> tags.
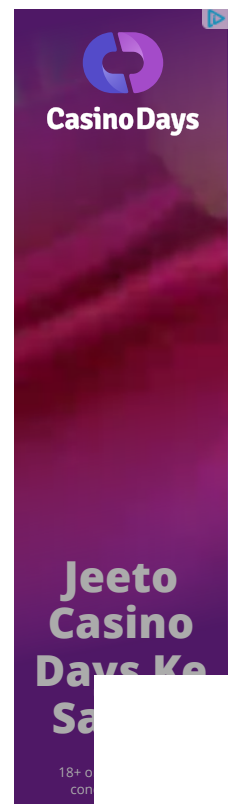

Display
> inline

Code Example

```
<video width="640" height="480" src="https://archive.org/download/Popeye_forPresident/Popeye_forPresident_512kb.mp4" controls>
  Sorry, your browser doesn't support HTML5 <code>video</code>, but you can
  download this video from the <a href="https://archive.org/details/Popeye_forPresident" target="_blank">Internet Archive</a>.
</video>
```
